Convert metric worksheet

Solve the following metric conversions:

3. 10.0 TB to MB

$$10.0 \text{ TB} \times \frac{10^3 \text{ G}}{1 \text{ TB}} \times \frac{1 \text{ MB}}{10^6 \text{ B}} = 10,000 \text{ MB}$$

4. 5.71×10^2 mL to μL

$$5.71 \times 10^2 \text{ mL} \times \frac{10^3 \mu\text{L}}{1 \text{ mL}} = 5.71 \times 10^5 \mu\text{L}$$

Prefix:	Symbol:	Magnitude:
tera-	T	10^{12}
giga-	G	10^9
mega-	M	10^6
kilo-	k	10^3
--	--	--
deci-	d	10^{-1}
centi-	c	10^{-2}
milli-	m	10^{-3}
micro-	μ (mu)	10^{-6}
nano-	n	10^{-9}
pico-	p	10^{-12}
femto-	f	10^{-15}

Metric Unit Conversion HW

Name: _____ Date: _____ Period: _____

Let's practice some more with conversions now! Convert the following!

1. 1000 m = _____ km
2. 1 km = _____ m
3. 1000 g = _____ kg
4. 1000 L = _____ kL
5. 1000 mg = _____ g
6. 1000 g = _____ kg
7. 1000 L = _____ kL
8. 1000 mL = _____ L
9. 1000 mL = _____ L
10. 1000 mL = _____ L
11. 1000 mL = _____ L
12. 1000 mL = _____ L
13. 1000 mL = _____ L
14. 1000 mL = _____ L
15. 1000 mL = _____ L
16. 1000 mL = _____ L
17. 1000 mL = _____ L

Great Job! We will review this briefly in class!

Convert measurements
Math worksheets from URBIOLOGY

Can you convert these measurements to smaller units?

1. 5 m = _____ cm
2. 7 m = _____ cm
3. 8 m = _____ cm
4. 10 m = _____ cm
5. 5 cm = _____ mm
6. 7 cm = _____ mm
7. 4 cm = _____ mm
8. 10 cm = _____ mm
9. 3 km = _____ m
10. 2 km = _____ m
11. 6 km = _____ m
12. 8 km = _____ m
13. 1 m = _____ mm
14. 7 m = _____ mm
15. 3 m = _____ mm
16. 9 m = _____ mm

Page 1

Name: _____ Score: _____

Metric Unit Conversion - Capacity

Convert:

1) 487 cL = _____ mL	2) 92.35 L = _____ cL
3) 71.9 cL = _____ dL	4) 33.32 hL = _____ kL
5) 285 dL = _____ L	6) 5.57 L = _____ daL
7) 57.38 dL = _____ mL	8) 894 kL = _____ hL
9) 68.201 daL = _____ dL	10) 7100 cL = _____ L
11) 193.3 L = _____ dL	12) 880 daL = _____ hL
13) 63.71 kL = _____ daL	14) 91.55 hL = _____ L
15) 1722 dL = _____ L	16) 4203 L = _____ kL

Printable Math Worksheets @ www.mathworksheets4kids.com

TEMPERATURE CONVERSION WORKSHEET 3

Work out all these conversions, rounding your answer to the nearest integer.

Convert to Celsius (give your answers to 1dp)		Convert to Fahrenheit (give your answers to 1dp)	
1)	140°F = _____ °C	11)	35°C = _____ °F
2)	66°F = _____ °C	12)	2°C = _____ °F
3)	45°F = _____ °C	13)	-8°C = _____ °F
4)	263°F = _____ °C	14)	72°C = _____ °F
5)	20°F = _____ °C	15)	160°C = _____ °F
6)	58°F = _____ °C	16)	-18°C = _____ °F
7)	350°F = _____ °C	17)	57°C = _____ °F
8)	10°F = _____ °C	18)	210°C = _____ °F
9)	0°F = _____ °C	19)	17°C = _____ °F
10)	420°F = _____ °C	20)	-5°C = _____ °F

Work out these mixed conversions.

21)	-1°C = _____ °F	26)	25°F = _____ °C
22)	42°F = _____ °C	27)	-10°C = _____ °F
23)	33°C = _____ °F	28)	12°F = _____ °C
24)	95°C = _____ °F	29)	190°C = _____ °F
25)	340°F = _____ °C	30)	95°F = _____ °C

Metric conversion worksheet convert the following. Convert metric units of length worksheet. Convert metric measures worksheet. Convert metric to imperial worksheet. Convert metric system worksheet. Convert metric units of measurement worksheet. Convert metric units worksheet pdf. Convert metric units worksheet.

It can be used to figure out how many "steps" are required to convert from one unit to another and what operation must be used. Students begin using non-standard units such as their own height and progress to using standard measurement units. Measuring Angles Worksheets Rectangle Measurement Worksheets Triangle Measurement Worksheets Area and Perimeter of Other Polygons Worksheets Worksheets for calculating the area and perimeter of polygons other than triangles and rectangles. Measurement tools enable students to learn hands-on and develop a deeper understanding of measurement concepts. Metres and litres are spelled with -re as you would find in many countries outside of the U.S. Metric System Conversion Guide (EU Version) Converting Between Millimetres and Centimetres (Euro number format) Converting Between Centimetres and Metres (Euro number format) Converting Between Millimetres and Metres (Euro number format) Converting Between Millimetres, Centimetres and Metres (Euro number format) Converting Between Metres and Kilometres (Euro number format) Converting Between Millimetres, Centimetres, Metres, and Kilometres (Euro number format) Converting Between Nanometres, Micrometres, Millimetres and Centimetres (Euro number format) Converting Between Milligrams and Grams (Euro number format) Converting Between Grams and Kilograms (Euro number format) Converting Between Milligrams, Grams and Kilograms (Euro number format) Converting Between Nanograms, Micrograms, Milligrams and Grams (Euro number format) Converting Between Millilitres and Litres (Euro number format) Converting Between Microlitres, Millilitres, Centilitres and Litres (Euro number format) Converting Between Millilitres, Centilitres, Litres and Kilolitres (Euro number format) Converting Between Common Metric Length, Mass and Volume Units (Euro number format) Converting Between Square Millimetres and Square Centimetres (Euro number format) Converting Between Square Centimetres and Square Metres (Euro number format) Converting Between Square Millimetres, Square Centimetres and Square Metres (Euro number format) Converting Between Square Metres, Square Hectometres and Square Kilometres (Euro number format) Converting Between Measurement Systems Worksheets Converting Between Metric and U.S. customary units can be accomplished in a number of ways and usually takes a little knowledge of fractions and/or decimals. For example, when converting from millimeters to kilometers, students would determine that it takes six steps to the left in the direction of the division sign to get from milli to kilo on the conversion line. Length, area, volume, capacity, mass, time and temperature are measurement concepts that people are exposed to everyday. Welcome to the measurement worksheets page at Math-Drills.com where you can measure up, measure down or measure all around! This page includes Measurement worksheets for length, area, angles, volume, capacity, mass, time and temperature in Metric, U.S. and Imperial units. Metric System Conversion Guide (U.S. Version) Metric System Conversion Lines Converting Between Millimeters and Meters Converting Between Millimeters and Meters Converting Between Millimeters, Centimeters and Meters Converting Between Millimeters and Kilometers Converting Between Millimeters, Centimeters, Meters, and Kilometers Converting Between Nanometers, Micrometers, Millimeters and Centimeters Converting Between Milligrams and Grams Converting Between Grams and Kilograms Converting Between Milligrams, Grams and Kilograms Converting Between Nanograms, Micrograms, Milligrams and Grams Converting Between Milliliters and Liters Converting Between Microliters, Milliliters, Centiliters and Liters Converting Between Common Metric Length, Mass and Volume Units Converting Between Square Millimeters and Square Centimeters Converting Between Square Centimeters and Square Meters Converting Between Square Millimeters, Square Centimeters and Square Meters Converting Within the Metric System (SI number format) The Metric or SI system uses thin spaces for thousands separators and spells metres and litres with -re rather than -er. Metric System Conversion Guide (SI Version) Converting Between Millimetres and Centimetres (SI number format) Converting Between Centimetres and Metres (SI number format) Converting Between Millimetres and Metres (SI number format) Converting Between Millimetres, Centimetres and Metres (SI number format) Converting Between Metres and Kilometres (SI number format) Converting Between Millimetres, Centimetres, Metres, and Kilometres (SI number format) Converting Between Nanometres, Micrometres, Millimetres and Centimetres (SI number format) Converting Between Milligrams and Grams (SI number format) Converting Between Grams and Kilograms (SI number format) Converting Between Milligrams, Grams and Kilograms (SI number format) Converting Between Nanograms, Micrograms, Milligrams and Grams (SI number format) Converting Between Millilitres and Litres (SI number format) Converting Between Microlitres, Millilitres, Centilitres and Litres (SI number format) Converting Between Millilitres, Centilitres, Litres and Kilolitres (SI number format) Converting Between Common Metric Length, Mass and Volume Units (SI number format) Converting Between Square Millimetres and Square Centimetres (SI number format) Converting Between Square Centimetres and Square Metres (SI number format) Converting Between Square Millimetres, Square Centimetres and Square Metres (SI number format) Converting Between Square Metres, Square Hectometres and Square Kilometres (SI number format) Converting within the Metric system (Euro number format) Similar to the previous two sections; however, these worksheets use dots for thousands separators and commas for decimals. Converting within the Metric system (U.S./U.K. Number Format) Converting Between Metric units is really an exercise in multiplying and dividing by powers of ten. Let's say, you had 20 students measure the height of the doorway. Have you ever met a student who didn't enjoy using a measuring wheel (you know the one that clicks every time you've traveled a yard or a meter)? Most Popular Measurement Worksheets this Week Temperature Worksheets Measuring and Converting Within Measurement Systems Worksheets Measuring lengths of bars Measuring length is so much more interesting if you can send students out with rulers and have them measure items in their environment, the classroom? You may like our converting inches and centimeters with rulers worksheets for students who have difficulty with manipulating the numbers and formulas and need an easier method. What is the width of the textbook? Our grade 5 measurement worksheets give students practice in converting between different measurement units for length, mass and volume and in converting units of measurement between the customary and metric systems. Each of the converting worksheets in this section includes a "Conversion Line" that includes the prefixes, symbols and powers. Most commonly, students will use a formula to convert and round the values. For more details, please see the Metric system conversion guide. This section is very similar to the previous section except for the differences in number formats and spelling. Being able to recognize and use for comparison, common measurement units such as the metre or foot, allows students to use their estimation skills to help them solve problems in measurement. How do you know they've measured things correctly though? Depending on which method they are taught, this could involve dividing by 10 six times, dividing by 106 or "moving the decimal" six places to the left. You should get 20 very similar answers (unless they are the sharing type then you'll get exactly the same answers) and any different answers can be quickly identified. the school? Circles Worksheets Surface Area and Volume Worksheets Worksheets for calculating the volume and surface area of various 3-dimensional objects. This is often found in languages other than English. Measurement concepts and skills give students the ability to perform tasks related to everyday life. This section is mainly for students in English Canada, however, anyone who uses spaces for thousands separators might like these worksheets. Well, you might need something like we've provided below. You can also compare students' measurements of the same objects to see if they got the same measurement. For squared units, each step counts as 100 or 102 and for cubic units, each step counts as 1000 or 103. Browse all of our measurement worksheets, from "bigger vs smaller" to the measurement of length, weight, capacity and temperature in customary and metric units.

It is used to convert the units between the same system, as well as the conversion between the metric and the English systems. It is based on the concept of equivalent values. Similarly, a conversion factor is defined as a number that is used to convert one unit to another unit by dividing or multiplying to get the equivalent values. The best example of this is SQUARE means AREA and the CUBIC means VOLUME. Consider the correct way of conversion and in this, you can round of the value to the nearest values if there are various decimal places. You can convert inches to centimeters for instance, there are two inches so one inch will be equal to 2.54 centimeters. Clear your mind to hyper-focus on one core action; setting a goal. Properly assess what your next goal should be by benchmarking where you currently are in life (we use a metric-driven approach to make it super simple). Get clear on what ultimate success looks like to make sure current goal helps you move closer to it (sometimes our current goal might not yet reach a 10 out of 10, ... May 10, 2019 · For example, when point P with coordinates (5,4) is reflecting across the Y axis and mapped onto point P', the coordinates of P' are (-5,4). Notice that the y-coordinate for both points did not change, but the value of the x-coordinate changed from 5 to -5. You can think of reflections as a flip over a designated line of reflection. Metric conversion charts and calculators for metric conversions Temperature Weight Length Area Volume Speed Time Angle Pressure Energy and Power Health and Wellbeing The metric system originated in France in 1799 following the French Revolution although decimal units had been used in many other countries and cultures previously. (4) Convert 50.0 mL to liters. (This is a very common conversion.) (5) What is the density of mercury (13.6 g/cm³) in units of kg/m³? We also can use dimensional analysis for solving problems. (6) How many atoms of hydrogen can be found in 45 g of ammonia, NH₃? It is used to convert the units between the same system, as well as the conversion between the metric and the English systems. It is based on the concept of equivalent values. Similarly, a conversion factor is defined as a number that is used to convert one unit to another unit by dividing or multiplying to get the equivalent values. Worksheet on Division of Metric Measures | Basic Metric Measurements. Practice the questions given in the worksheet on division of metric measures. Metric measures are divided in the same way as we divide ordinary numbers. 1. Divide the following: (i) 6 g 9 dg 7 cg 5 mg by 3 (ii) 4 kl 2 hl 5 dal 4 l by 2 (iii) 7 l 3 dl 6 cl 5 ml by 5 Ace it like a pro and convert between bigger units and smaller units with this set of 3rd grade and 4th grade worksheets. Featuring integers with metric units of length like km, m, cm, and mm, each pdf worksheet is supplied with problems in three different formats along with a word problem. For example, CONVERT can translate a table of distances in miles to a table of distances in kilometers. Syntax. ... The following abbreviated unit prefixes can be prepended to any metric from unit or to unit. Prefix. Multiplier. Abbreviation. yotta. 1E+24 "Y" zetta. 1E+21 ... Copy the following to a blank worksheet. 1. 2. A. Data. 6. Formula ... Aug 23, 2021 · Time worksheets grade 5. The worksheets on this page are devoted to practicing 24 hour times and change with each worksheet you make. The conversion table on this math worksheet shows your child how to convert days weeks minutes and hours then gives your child the chance to practice converting these units of measurement. Metric Mania Survey (pdf) - This worksheet is used at the end of the unit to review the material we have studied. ... To convert from meters to millimeters, it would take 3 jumps to the right which would mean the decimal would need to move 3 jumps to the right. As they learn the process and understand the value of the metric prefixes, 1 ... Math worksheets: Convert lengths (mm, cm, m and km) Below are six versions of our grade 6 math worksheet on converting common metric units of length (mm, cm, m and km). These worksheets are pdf files. The Excel CONVERT function converts a number in one measurement system to another. For example, you can use CONVERT to convert feet into meters, pounds into kilograms, Fahrenheit to Celsius, gallons into liters, and for many other unit conversions. Jan 03, 2022 · If you do not have a list of common conversion factors in your book, you may wish to download and print this sheet of common conversion factors for the geosciences (Acrobat (PDF) 40kB Sep3 09). open the link below to use while you make your calculations. If you need a reminder of the steps, you can download and print this worksheet (Acrobat (PDF) 44kB Apr11 ... Welcome to the measurement worksheets page at Math-Drills.com where you can measure up, measure down or measure all around! This page includes Measurement worksheets for length, area, angles, volume, capacity, mass, time and temperature in Metric, U.S. and Imperial units. Measurement concepts and skills give students the ability to perform tasks related to everyday ... Aug 23, 2021 · Time worksheets grade 5. The worksheets on this page are devoted to practicing 24 hour times and change with each worksheet you make. The conversion table on this math worksheet shows your child how to convert days weeks minutes and hours then gives your child the chance to practice converting these units of measurement. The metric system: all units. The worksheet below involve converting between a range of metric units, not just the most common ones. Metric system: convert between the units of length (mm, cm, dm, m, dam, hm, km) View in browser Create PDF Metric system: convert between the units of weight (mg, cg, dg, g, dag, hg, kg) View in ... Jan 03, 2022 · The Science Spot's Metric Mania Page has two worksheets that have unit conversion practice problems (answers are provided, but not worked through): English or Metric? (Acrobat (PDF) 5kB Oct9 07) | Conversion within Metric System (Acrobat (PDF) 8kB Oct9 07) Oak Road Systems has several practice problems with answers (but not worked through). This worksheet will challenge your third graders with problems on area, perimeter, measurement, and elapsed time problems. ... Learners will refer to a metric conversion chart to answer 16 questions in this introduction to metric units of length. 3rd grade. ... Familiarize yourself with the metric system! Convert units of measurement in this ... Create an unlimited supply of worksheets for conversion of metric measurement units or for metric system in general, for grades 2-7. The worksheets can be made in html or PDF format — both are easy to print. You can also customize them using the worksheet generator provided. Convert between metric measures of distance, volume, and mass. Convert between metric measures of distance, volume, and mass. If you're seeing this message, it means we're having trouble loading external resources on our website. On this webpage, you will find a range of measurement worksheets to help your child learn to convert between different metric units of measurement. As well as converting between different metric units, the sheets on this page will also help children to practice multiplying by 10, 100 or 1000 in meaningful context. Convert Between Percent, Decimal, Fraction Convert Repeating Decimals to Fractions. ... English/Metric Conversions Metric/Metric Conversions Metric/Metric Conversions Add, Subtract Feet & Inches ... The Math Worksheet Site is provided by Scott Bryce. sbryce@scottbryce.com. Convert metric lengths (with decimals) Measurement worksheets: Converting metric units of length. Below are six versions of our grade 5 math worksheet on converting between different metric units of length; use of decimals will be required. These worksheets are pdf files. Open PDF. May 10, 2019 · For example, when point P with coordinates (5,4) is reflecting across the Y axis and mapped onto point P', the coordinates of P' are (-5,4). Notice that the y-coordinate for both points did not change, but the value of the x-coordinate changed from 5 to -5. You can think of reflections as a flip over a designated line of reflection. Learning metric units have a whole lot of advantages, it's simple as it's units scale to the power of 10. Trigger some interesting practice along the way with this huge compilation of metric unit conversion worksheets comprising a conversion factors cheat sheet, and exercises to convert metric units of length, mass or weight, and capacity.
